O-RINGS

Today's O-Ring Story: Selecting the Correct Type For the Job

Selecting Which Type Of O-Ring To Use Should Be Based Temperature; High Temp. vs. Low Temp.

GREEN (HNBR) O-Rings Should Be Used For Vehicles Serviced At High Temperature (300 Degrees or Below).

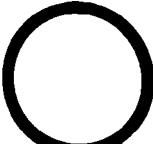

BLACK Nitrile O-Rings or BLUE Neoprene O-Rings Should Be Used For Vehicles Serviced At Low Temperature

(250 Degrees or Below). With The Higher Performance Expectations In System Temperatures & System Lubrications,

The HNBR Rubber (GREEN O-Rings) Will Perform At Most Required Specifications!
