Thank you for considering Henry's Automotive Warehouse for your Automotive Fastener, Abrasives, and Specialty Supplies needs. Since our start in 1984, our goal has been to provide quality products at wholesale prices, while still providing the best service in the industry. We stock all of the items in this catalog and strive to ship all orders the same day.

We have taken the items which we've found to be most used by shops and offer them in different pack sizes as well as larger bulk quantities. Taking advantage of the discounted bulk pricing on top of our free fastener shipping can add up to huge savings! To help make life even easier, we designed a special piggyback packaging label that peels off. You can peel it off and apply it to your bin to help stay organized and to make re-ordering easy.

In 2017 Henry's joined the Raybuck Auto Body Parts family. Raybuck is one of the top destinations for aftermarket restoration parts for light duty trucks, vans, SUVs and cars. The decision to bring the two companies together was easy as both focus on providing quality parts at fair prices, and providing outstanding customer service. We look forward to continuing to service you for all of your fastener and body panel needs.

Sincerely, Steve DeFrancesco

Fastener OEM Number Cross Reference

We can cross reference any automotive fastener OEM number and most supplier part numbers.

We built a comprehensive OEM number cross reference database into our website. There are two ways to search it:

1. Simply type the OEM number into the search bar at the top of the site and if there's a corresponding Henry's part number the system will show it.
2. If the system doesn't return a Henry's match, click on the "Automotive Fastener OEM Numbers" link at the bottom of the website and then enter that same OEM number in the resulting search box. This will at least show you if the OEM number that you have is in our database. From there, please call us to see if we can find this fastener for you.

You can always call or email us (800-239-8149 or service@henrysautowarehouse.com) and we'll be happy to look up the OEM number for you as well.

We can typically get special order items within a few business days, and we guarantee that it will be less expensive buying from us than the dealer!

COST RECOVERY SYSTEM

Stop losing money on fasteners. Use this cost recovery system to generate invoices for fasteners and supplies!

NEW

We partnered with Disco Automotive to offer shops the Disco Rapid Recovery system. This easy-to-use, web based cost recovery system can be used by shops to generate invoices for body repair fasteners and supplies that are used in daily collision repairs. Once created, an invoice can be submitted to the insurance company for reimbursement. Imagine getting reimbursed for all of your fasteners AT DEALER PRICE!

The system is extremely easy to set up and use, and it already contains all Henry's part numbers. A shop can also add an unlimited number of their own part numbers and shop supplies. This allows the shop to simply scan or key in the items that are used on a repair and generate an invoice for them. Training is provided for setup and use.

Shops can also use the system as an inventory management system for their fasteners and can even generate POs through it for re-ordering. Simply scan the items that you're low on and add them to a PO.

Taking it a step further, use the system to generate product usage reports and profit reports. Keep track of your fasteners and supplies and help reduce inventory shrinkage.

If you haven't adopted a cost recovery system because you're afraid of the cost, don't be. The Rapid Recovery system has a minimal $200 setup fee and $150 yearly renewal fee. It can pay for itself in just a handful of repairs.

If you'd like to start making money on your fasteners and supplies instead of losing money, call us today at 800-239-8149.

System Installation Notes:

- This system is web-based but will only work on a PC/laptop and not on a tablet or phone.
- A barcode scanner (wired or wireless) that is capable of working with 1 digit codes is necessary. A Honeywell scanner is available for $150.
- CCC One Compatible but requires additional subscription charge

OEM & COMPETITOR CROSS REFERENCE

We can cross reference any automotive fastener OEM number and most supplier part numbers.

We built a comprehensive OEM number cross reference database into our website. There are two ways to search it:

1. Simply type the OEM number into the search bar at the top of the site and if there's a corresponding Henry's part number the system will show it.
2. If the system doesn't return a Henry's match, click on the "Automotive Fastener OEM Numbers" link at the bottom of the website and then enter that same OEM number in the resulting search box. This will at least show you if the OEM number that you have is in our database. From there, please call us to see if we can find this fastener for you.

You can always call or email us (800-239-8149 or service@henrysautowarehouse.com) and we'll be happy to look up the OEM number for you as well.

We can typically get special order items within a few business days, and we guarantee that it will be less expensive buying from us than the dealer!

Did you know that our part labels now include a barcode and a QR code?

- The barcode can be used to find that part in the Cost Recovery program.
- Scan the QR code to view the part's product page on our website. From there you can find all the related part information as well as add it to an order if you'd like.

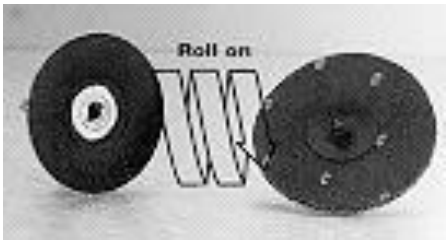
Brake Rotor Surfacing Discs-

Non Directional Abrasive Discs, 120 grit Aluminum Oxide with a Type 3 Screw Mount



These are the type of Brake Rotor Surfacing Discs which G.M. and other manufacturers recommend using on brake rotors to achieve the proper non-directional swirl surface finish of 60 micro-inches or less after brake rotors have been resurfaced on a lathe.

The Original TRIM-KUT DISCS

Trimable Grinding Discs on a Reversible Co-Polymer Backing

When a Trim-Kut disc finally "loads-up" just run the disc against a sharp edge and the loaded-up disc edge trims itself off. To change from "Push-Grind" to "Pull-Grind" for those hard to reach inside edges, simply reverse the disc on your mandrel by screwing the mandrel from the backing side through the reversible disc.

COLLISION WRAP / MASKING PLASTIC

Collision Wrap

Self Adhering COLLISION WRAP covers & protects cracked windshields, broken windows, sprung doors, caved-in roofs, and any opening that exposes vehicle or cab interior to risk of damage from rain, wind, snow, dirt, etc.

- Durable 3 mil Puncture-Resistant, See-Through plastic film with UV Inhibitors.
- Adheres to Clean & Dry Surfaces: metals, glass, plastics, interior surfaces & fabrics.
- Leaves No Adhesive Transfer on paint surfaces or rubber, aluminum, fabrics, plastic trim and mouldings.
- One Man Application... One Pass Covers Most Openings.

BS31201 36” x 100 ft. Roll $ 54.00

E-Z View Clear Masking Plastic

- Airborne Particles Are Attracted To This Clear Masking Plastic, Not To Your Finish.
- E-Z View Clear Masking Plastic is Specially Treated So Paint Overspray Sticks to It Like Glue. Particles Won't Flake Or Blow Off.
- E-Z ier to Mask. Static Cling Holds Plastic in Place until Ready to Tape & Requires Much Less Tape than Paper.
- E-Z View Clear Masking Plastic is Waterproof, Thereby Eliminating the Need to Re-Mask After Wet Sanding. E-Z ier to shape than paper and it's Lint Free

This Plastic is so clear that it reflects the color of the vehicle in the booth, unlike paper which casts a tint of green, blue, gold, or red on the job.

RUST REPAIR & MIXING

Easily remove rust from any part or tool! As seen on MotorTrend Network!

There are three methods for using Rust Release® to remove rust off of car parts and tools:
1. Dip your items into our tank or any container with the Rust Release®, soak, and let dry.
2. On light surface rust, spray your metal items using Rust Release®.
3. Apply the SuperGel® on your metal by brushing, wrapping with plastic, and wiping the solution with a Scotch-Brite pad until the rust comes off.

Industrial strength formula works faster and lasts longer than competing products!

DISPOSABLE PAINT GUN CUPS

NEW

The CTW CS line of disposable paint gun cups combines all the steps of paint preparation into one easy system. Simply insert the liner into our hard cup to mix and measure, snap the filter lid on the cup, thread the collar on the hard cup, and you are ready to spray. The closed system allows you to spray with the gun at any angle, even upside down. Cleanup is easy: detach from the gun and throw away the lid and liner, or seal the lid with the stopper for later use.

Each case includes:

1. 1 Hard Cup
2. 50 liners
3. 50 lids*
4. 1 Collar
5. 20 stoppers

*190 micron lids for solvent based paints
